WHY THAILAND SCIENCE PARK?

Strategic Location

- **Prime Access:** Near 7 industrial estates
- **Academic Proximity:** Close to Asian Institute of Technology, Thammasat University, and Sirindhorn International Institute of Technology
- **Convenient Travel:** 30 minutes from Don Mueang International Airport

Robust Innovation Ecosystem

- **Innovation Hub:** Home to 5 national research centers
- **Collaborative Environment:** Over 120 tech companies with 40% international
- **Research Powerhouse:** Linked with top S&T universities and hospitals

Pool of R&D Experts, Testing Labs, and Standardization

- **Dedicated Support:** Researchers committed to advancing private sector R&D and innovation
- **Holistic Guidance:** Combining technical skills with business acumen for comprehensive support
- **State-of-the-Art Testing Labs:** Cutting-edge facilities for rigorous testing and validation of products
- **Standardization Excellence:** Ensuring compliance with international standards to enhance product quality and marketability

Strong Network with Strategic Partners

- **Seamless Collaboration:** Close ties with 5 national research centers
- **Global Reach:** Connections to international partners for expansion

Excellent Quality of Life:

- **Superior Amenities:** Modern facilities and comprehensive services
- **Balanced Living:** Access to recreational areas and green spaces
- **Prime Location:** Near healthcare, education, and cultural attractions

THAILAND SCIENCE PARK

The Largest & Fully-Intergrated R&D Hub in Thailand

Established in 2002, Thailand Science Park (TSP) is dedicated to driving innovation and advancing R&D activities within the private sector. Our mission is to cultivate an innovation ecosystem that bridges government entities with private firms, fostering the creation of cutting-edge technology businesses.

Thailand Science Park (TSP) is home to five National Research Centers spanning 80 acres: the National Center for Genetic Engineering and Biotechnology (BIOTEC), the National Metal and Materials Technology Center (MTEC), the National Electronics and Computer Technology Center (NECTEC), the National Nanotechnology Center (NANOTEC), and the National Energy Technology Center (ENTEC). Our community comprises 3,000 full-time researchers, including approximately 800 Ph.D. level experts.

Alongside these centers, over 120 technology companies nearly 40% of which are international firms are located within TSP. More than 1,000 researchers from tenant companies engage in collaborative research and joint innovation initiatives, benefiting from our strategic location and resources. With close proximity to two leading science and technology universities, hospitals, seven industrial estates, and just a 30-minute drive from Don Mueang International Airport, TSP offers an ideal environment for innovation and partnership.

BUSINESS SERVICES

Thailand Science Park

At Thailand Science Park, we strive to provide comprehensive business services that empower companies to innovate, grow, and succeed.

Our ecosystem is designed to support technology transfer, offer financial and tax incentives, and promote business growth for startups and SMEs.

01

Technology Transfer

Joint Research and Contract Research: Collaborate with leading researchers and institutions to advance your projects.

Technology Transfer and Licensing: Seamlessly transition your technologies from the lab to the market.

Technology Consulting: Leverage our expert advice to navigate the complexities of technology commercialization.

02

Finance and Tax Privileges / Incentives

BOI Support Benefits: Utilize the Board of Investment (BOI) incentives to maximize your investment returns.

200% Tax Exemption for R&D: Enjoy significant tax savings with our Research Certification Development and Engineering program, offering up to 200% tax exemption.

03

Business Promotion for Startups and SMEs

Driving Research Towards Commercialization:

Transform your innovative ideas to market-ready products.

Thailand Science Park & Depa Acceleration Center (TD-X):

Accelerate prototype design and development, offering expert guidance in design, manufacturing, testing, and market validation to ensure products meet consumer needs and achieve commercial success.

INNO-X Space: A space perfectly designed for startups, foreign tech companies expanding into Thailand.

R&D RENTAL SPACE

Thailand Science Park

Advanced R&D facilities and various specialized spaces offering

Modular Design

Designed to be spacious with an adjustable layout to suit particular purposes.

Clean Room

Designed for electronics and medical-related experiments that require an ultra-clean environment.

Heavy Equipment Area

Designed to support the installation of heavy equipment with a load of up to two tons per square meter.

Central Testing Laboratory

Equipped with high-performance equipment for advanced research, the lab provides technical testing and analytical services with expert team.

Sensitive Lab

The suitable for sophisticated research using advanced technology such as nanotechnology.

NATIONAL QUALITY INFRASTRUCTURE

Thailand Science Park

Thailand Science Park sets the standard for innovation with specialized testing centers designed to empower businesses to meet and exceed international benchmarks.

Whether in electronics, ceramics, health, medical, or engineering, these state-of-the-art facilities and cutting-edge technology support your success.

PTEC - Electrical and Electronic Products Testing Center:

Provides testing, calibration, research, and development services for electrical and electronic products, ensuring compliance with international standards.

CTEC - Industrial Ceramic and Houseware Product Testing Center:

Offers analysis and testing for tableware, biodegradable plastics, construction materials, and sanitary ware, focusing on compliance with national and international safety standards.

NCTC - NSTDA Characterization and Testing Service Center:

Delivers advanced analysis and testing with modern tools and technology, supporting research and industry with quality that meets global standards.

TBES - Toxicology and Bio Evaluation Service Center:

Provides toxicological testing and biological assessment for health, medical, and industrial chemical products, adhering to international quality systems.

NFED - NSTDA Fabrication and Engineering Service Division:

Specializes in the design and creation of prototypes and engineering workpieces, as well as the maintenance and repair of laboratory equipment.

NATIONAL S&T INFRASTRUCTURE

Thailand Science Park

At Thailand Science Park, we are at the forefront of R&D advancement, offering cutting-edge facilities that drive innovation, sustainability, and global competitiveness. Our world-class infrastructure is purpose-built to accelerate breakthroughs across industries, empowering businesses.

NBT - National Biobank of Thailand:

Dedicating to the storage and preservation of biological resources through a state-of-the-art facility, including plants, microorganisms, and human genome data, NBT is certified to international standards and ensures these resources are conserved for sustainable use.

ThaiSC - NSTDA Supercomputer Center:

Delivering high-performance computing services that address complex national challenges requiring speed and precision. ThaiSC is where data meets power, driving innovation across industries.

NOC - National Omics Center:

Pioneering the development of advanced methods in Genomics, Transcriptomics, Proteomics, and Metabolomics. NOC sets the standard for modern, efficient analysis that meets the highest academic and research standards.

TIIS - Technology and Informatics Institute for Sustainability:

Specializing in data preparation and life cycle assessments to support the circular economy. TIIS is your partner in driving sustainable growth and enhancing international competitiveness.

TMEC - Thai Microelectronics Center:

Offering comprehensive microelectronics services, from sensor production to the creation of electronic devices on silicon wafers, supporting innovative sensor technology and advanced electronics.

Where Innovation Starts and Grows Prosperously and Sustainably

Unlock opportunities through our **CONNEX**, designed to connect you with NSTDA, Thailand Science Park member, and a strong network of strategic partners making **collaboration easier and more impactful**.

Scope of Services

Advisory Clinic

Consulting on NSTDA services and innovation support with experts, in collaboration with partner agencies within the Science Park ecosystem.

Open Innovation

Connecting business partners to explore new opportunities or expand to new markets via local and international networks.

Business Matching

Serving as a platform to communicate business needs and welcome collaboration in technology to accelerate innovation development.

Funding Support

Connecting businesses with funding sources.

THAILAND SCIENCE PARK CONVENTION CENTER

Your success is our success

The Perfect Venue for Knowledge Exchange and Innovation

Thailand Science Park Convention Center (TSPCC) offers more than just a space. It provides an environment where ideas flourish and connections are made. Whether hosting a scientific conference, a tech expo, or a corporate seminar, the state-of-the-art facilities are designed to meet every need.

With over 30,000 square meters of versatile event space spread across four floors, TSPCC is the ideal location for events of all sizes. From the expansive exhibition hall to fully equipped meeting rooms, each space is designed for smooth operations and a memorable experience. The dedicated team pays attention to every detail, providing warm and professional service to make every event seamless and enjoyable.

Certified Excellence

TSPCC is certified to international standards by the Thailand Convention and Exhibition Bureau (TCEB), ensuring that your event is held to the highest levels of quality and sustainability. Our venue meets Thailand MICE Venue Standards (TMVS), ASEAN MICE Venue Standards (AMVS), and Thailand Sustainable Event Management Standards (TSEMS).

Spaces Tailored to Your needs

1st Floor: A 2,040 sqm exhibition hall, perfect for large-scale events with flexible setup options.

2nd Floor: A 410 sqm special event area, ideal for a variety of events, complete with restaurants and refreshment options.

3rd-4th Floors: Modern meeting and seminar rooms, equipped with the latest technology, offering spaces ranging from 68-130 sqm. These floors also feature a 480 sqm Auditorium, perfect for large conferences or presentations.

AMENITIES

Thailand Science Park

PRIVILEGES & INCENTIVES

Thailand Science Park

Thailand's Board of Investment (BOI) Privileges

Corporate tenants conducting research and development in Thailand Science Park will receive maximum investment privileges from BOI

Revenue Department Incentives

Accelerated Depreciation Rate for R&D Machineries and Equipments.

200% Tax Deduction for R&D Expense.
